OBJECTIVE

Aspiring Software Developer / Data Analyst skilled in full-stack development and data analytics. Interested in building data-driven applications, extracting insights, and solving real-world problems.

SKILLS

Languages	Python, JavaScript, Java, C++, HTML, CSS
Frameworks / Tools	Flask, Node.js, Git, GitHub, VS Code
Database	MySQL, MongoDB
Data Analytics	Pandas, NumPy, Matplotlib, Data Visualization, EDA, NLP Basics

EXPERIENCE

Intern — SparkLab IT Solutions Pvt. Ltd.

June 2025 – July 2025

Worked on Python-based applications, debugging, and real-world software modules. Gained hands-on experience in development workflows.

PROJECTS

E-Commerce Review Sentiment Analysis & Insight Engine

[GitHub](#)

- Built an NLP pipeline using VADER (NLTK) to classify customer reviews (Positive/Neutral/Negative)
- Performed data preprocessing and EDA on 10,000+ review dataset
- Generated 8+ visualizations (rating trends, sentiment distribution, keyword analysis)
- Produced actionable business insights identifying customer pain points and satisfaction trends

Recipe-Modifier

[GitHub](#)

- Developed full-stack web app using Flask and MongoDB for personalized recipe modification
- Implemented ingredient analysis and AI-based recommendations
- Enabled PDF report generation and user authentication

EDUCATION

B.Tech in Computer Science

2022 – 2026

Sant Gajanan Maharaj College of Engineering

Class: First Class

HSC

2021 – 2022

Maharashtra State Board — 65.17%

SSC

2020 – 2021

Maharashtra State Board — 91%

SUMMARY

Strong foundation in full-stack development and data analytics. Experienced in building scalable applications and extracting insights from data using Python. Passionate about solving real-world problems through technology.
